

It's been one year already!

It's time for the first HOMED newsletter!

(please make sure you allow your e-mail client to show the full version of the newsletter including images)

This is where we started...

The project kick-off marked the beginning of a five year mutual collaboration with the goal to develop a full panel of scientific knowledge and practical solutions for the management – from assessment to control – of emerging native and non-native forest pests and pathogens.

HOMED at Conferences

French Academy of Agriculture on 28 November 2018 in Paris, France

More information available [here](#).

IUFRO Conference in July 2019 in Quebec, France

HOMED's scientific progress

Real-time loop-mediated isothermal amplification: an early-warning tool for quarantine plant pathogen detection

[Chiara Aglietti](#), [Nicola Luchi](#) , [Alessia Lucia Pepori](#), [Paola Bartolini](#), [Francesco Pecori](#), [Aida Raio](#), [Paolo Capretti](#) & [Alberto Santini](#)

Egg mass structure of the processionary caterpillar *Ochrogaster lunifer* (Lepidoptera: Notodontidae): is the outer egg layer sacrificed for attack by the egg parasitoid *Anastatus fuligispina* (Hymenoptera: Chalcidoidea: Eupelmidae)?

Mizuki Uemura,^{1,2,*†}  Lynda Perkins¹, Andrea Battisti² and Myron Zalucki¹

Complex Insect-Pathogen Interactions in Tree Pandemics.
